Von Duprin AX

The Von Duprin AX was born out of a need to provide the market with a solution that meets recent California Building Code enhancements. Beginning in January 2014, the California Building Code (Chapter 11B-309.4) established a 5 lb. maximum force of operable parts on doors and gates.

Through engineering and testing Von Duprin has developed a new Accessible (AX) option that is UL certified to meet the maximum 5lb operating force requirements according to California Building Code section 11B-309.4. This AX option is available for the Von Duprin 98/99, 22, and 33A/35A series in a variety of device types and functions.

Identifying Von Duprin AX

1. Look for the "AX" Prefix in the door schedule and/ or specification.
2. In the field, look for the California Compliance note on the UL Label and the AX Device Label. Both labels can be found on the center case cover of the exit device as shown below.

Von Duprin AX Availability

Von Duprin will begin accepting orders for AX devices on May 5th 2014. Please contact your local Allegion Representative or call Customer Care at 1-877-671-7011 for more information.
