Title:	LCN Full Length Actuator
Date:	February 4th, 2013
Product:	Full Length Actuator
Viewers:	Internal/External

Dear Customers,

LCN is pleased to announce the release of our new 36" Full Length Actuator. In situations where it is essential to be able to activate an automatic operator from different heights or angles (e.g. using the footrest on a wheelchair), the 36" x 6" activation surface on the Full Length Actuator is the perfect solution! In compliance with CA Building Code, Section 1133B.2.5 (which requires the ability to activate the automatic operator from 5" to 8" from the ground), the Full Length Actuator has several perks:

- First and foremost, its ease of installation beats installing two actuators any day
- It can be mounted to any flat surface or bollard within minutes
- It has both hard-wired and wireless capabilities
- The 36" x 6" activation area makes ease of activation a priority for any user
- Stainless steel construction and a sleek, 1" low-profile provides both top of the line durability and first class appearance
- It is also weather resistant, so no need to worry about harsh weather conditions
- It is compatible with all of our automatic operators

The LCN Full Length Actuator will be available on February 18th, 2013. Check out the data sheet for more information, and place your order now!
