

# ADJUST RODS

1. Open door and release top latch bolt as shown (Figure 1).

Figure 1

2. Loosen bottom locking screw (Figure 2).
3. Disconnect bottom vertical rod by removing bottom adjusting screw.
4. Loosen top locking screw.
5. Rotate top adjusting screw clockwise until top latch bolt is fully extended (Figure 1).
6. Check top latch bolt for deadlocking (latch bolt should not push in).
7. Turn top locking screw in. Do not over-tighten.

Figure 2

8. Depress pushbar and release.
9. Make sure top latch bolt stays retracted as shown.

Figure 3

10. Install bottom adjusting screw through bottom rod (Figure 2).
11. With top latch bolt still retracted, adjust bottom rod so latch bolt clears floor and bottom strike.

Figure 4

12. Turn bottom locking screw in. Do not over-tighten.
13. Check device operation by opening and closing door several times from the outside.

**Redo adjustment procedure if :**

- Top latch bolt is not held retracted
- Bottom latch bolt does not clear floor and bottom strike
