# Heavy Duty Pull Mounting Upgrade

In an effort to continue providing the highest quality products and align with market demand Ives has upgraded the mounting screws provided for the majority of 8000 and 9000 series pulls.

## Pull Mounting Upgrade

The new and improved mounting screws resulted in a model change. The new upgraded product has the addition of HD in the description. The cross reference chart below provides the discontinued model number, the original bolt diameter and the new model number with the upgraded bolt diameter.

Discontinued Product		Upgraded Product	
Discontinued Model	Original Bolt Diameter	New Model	Upgraded Bolt Diameter
8102	1/4"	8102HD	5/16"
8103	1/4"	8103HD	3/8"
8103EZ	1/4"	8103EZHD	3/8"
8190	1/4"	8190HD	3/8"
9100	1/4"	9100HD	3/8"
9103EZ	1/4"	9103EZHD	3/8"
9190	1/4"	9190HD	3/8"

In addition, the upgrade impacts the 8302 and 8303 pull plate models when paired with the 8102HD and 8103HD. The 8105, 8111, 8112, 8121 pull models and 8305, 8311 pull plate models were not impacted by this change.

## Replacement Parts

Mounting packages for the discontinued models can still be obtained for old field installations. Please reference the parts section of the new January 2015 Ives price book for part numbers and list prices.
